

APPENDIX OF QUESTIONS

Chapter 1: User Interface Questions	3
Startup Screen	3
<i>What are some of the key components on the startup screen?</i>	3
<i>How do I access context sensitive help*?</i>	4
Getting Started Tips*	5
<i>What are the key mouse functions?</i>	5
<i>How do I view objects?</i>	5
<i>How do I select objects?</i>	6
<i>How do I modify objects?</i>	6
<i>Can I access commands using the key board?</i>	8
<i>What are Work Planes?</i>	8
<i>How do Tool Palettes work?</i>	9
<i>How do Create Custom Tool Palettes?</i>	10
<i>How do I set Text and Dimension attributes?</i>	11
<i>What training is included with the application?</i>	11
<i>What other resources are available for ViaCAD?</i>	12
Selecting Objects	12
<i>How can I quickly select everything in the drawing?</i>	12
<i>Is there a way to select by object color or type?</i>	13
<i>How can I add specific types to the current Select Mask?</i>	13
<i>Can I select an entire object by boxing just a portion of it?</i>	13
<i>How can I select one object when it's already part of a group?</i>	13
<i>Is it possible to select a specific face and change its color?</i>	14
<i>How can I move overlapped object end points?</i>	14
<i>Why does Select Chain sometimes fail with the Extrude Solid tool?</i>	15
<i>What can I use the Select Deep tool*?</i>	15
Modifying Objects	16
<i>How can I Nudge Objects using the Arrow keys?</i>	16
<i>Is it possible to modify an object's selected points by an explicit xyz value?</i>	16
<i>How can I display the Inspector?</i>	16

<i>What are some of the features of the Inspector?</i>	17	
<i>What does the Objects Properties tab do?</i>	17	
<i>What does a blank field in the Object Properties dialog box mean?</i>	18	
<i>Can I assign default inspector settings from an object?</i>	18	
<i>What does the * symbol mean in a dialog box?</i>	18	
<i>Can I change the coordinates of the Data Entry area?</i>	19	
<i>Is there another way to quickly delete objects?</i>	19	
<i>What can I type into a text field?</i>	20	
<i>Can I assign a Shortcut to toggle the Inspector on/off?</i>	20	
<i>How do I assign a shortcut to the right button menu*?</i>	21	
<i>Why are my shortcut keys not working*?</i>	21	
<i>Can I copy a value from the entity context menu*?</i>	21	
<i>How do I change the pen weight of a line with the Inspector*?</i>	22	
<i>How can I change a line weight with the right button*?</i>	22	
<i>How do I change the pen pattern of a line with the Inspector*?</i>	23	
<i>How can I change a pen pattern with the right button*?</i>	23	
<i>How do I scale only along the x axis*?</i>	23	
<i>How do I control the layer for pasted objects*?</i>	24	
The Gripper		25
<i>How do I enable the Gripper?</i>	25	
<i>What do each of the Gripper handles do?</i>	25	
<i>How can I control the Gripper axis ?</i>	26	
<i>How can I rotate a face with the Gripper?</i>	26	
<i>What does the 'Object to Axis' option do?</i>	26	
<i>What does the 'Axis to Object' option do?</i>	27	
<i>How can I copy a feature with the Gripper?</i>	27	
<i>What Shortcuts exist for the Gripper?</i>	28	
<i>Can I specify the Gripper Location for an object?</i>	28	
WorkPlanes		29
<i>How can I see my current work plane orientation?</i>	29	
<i>How do snaps work in reference to the WorkPlane?</i>	29	
<i>Can I align the WorkPlane to a curve?</i>	29	
<i>How can I change the WorkPlane?</i>	30	
<i>Is it possible to rotate the WorkPlane?</i>	30	
Snaps		30

<i>How can I lock my snaps to a specific axis?</i>	30	
<i>Where can I adjust snap settings for LogiCursor?</i>	30	
<i>Where can I change the snap filters?</i>	31	
<i>How can I find the apparent Intersection of two lines?</i>	31	
<i>Can I toggle snaps using a shortcut?</i>	31	
Tool Palettes		32
<i>How do I tear away tool palettes?</i>	32	
<i>How do I collapse tool palettes?</i>	32	
<i>How can I control the orientation of my tool palettes?</i>	33	
<i>Is there a way to neatly align tool palette edges?</i>	33	
<i>After switching from two monitors to one, I've lost my tool palettes!</i>	33	
<i>Can I display a dedicated text font palette*?</i>	34	
<i>How can I display more colors in the Pen Palette?</i>	34	
Preferences		34
<i>How do I save my Preferences as Defaults?</i>	34	
<i>How do I make user defined styles, layers and views for new drawings?</i>	35	
<i>Can I transfer my keyboard shortcuts to another machine?</i>	35	
<i>How can I find out if a tool is assigned a shortcut?</i>	36	
<i>How do I assign a function key to a shortcut?</i>	36	
<i>Can I make the Main Tool Palette smaller?</i>	36	
<i>How do I show the file paths under recently opened files?</i>	37	
<i>How can I set up BackUp files?</i>	37	
<i>How do I show the file paths under recently opened files?</i>	38	
<i>Where are the BackUp files located*?</i>	38	
<i>How do I reset my preferences*?</i>	38	
Layers		39
<i>When and how can I drag and drop layers?</i>	39	
<i>Can I suspend the repaint update when turning on/off layers?</i>	39	
<i>Is there a suggested technique for managing sketches used for solids?</i>	39	
<i>How can I delete all objects in a Layer?</i>	40	
<i>How can I quickly step through layers*?</i>	40	
Performance		41
<i>Does resolution impact performance?</i>	41	
<i>How do silhouette edges impact performance?</i>	41	
<i>Does anti-alias impact performance?</i>	42	

<i>Is it possible to reduce the disk space required by ViaCAD?</i>	42
<i>What does the spinning rainbow cursor on the Mac imply?</i>	43
<i>What tools are multi-threaded*?</i>	43
Concept Explorer	43
<i>What is Concept Explorer?</i>	43
<i>How do I filter the objects that are displayed in the Feature Tree?</i>	44
<i>Can I minimize the size of Concept Explorer?</i>	44
<i>Can I suspend Associativity?</i>	44
<i>Where can I find a title block?</i>	45
<i>Is it possible to snap to faces in the Push/Pull tool?</i>	45
<i>Why does the application change the basic colors at launch on Windows?</i>	46
Localization	46
<i>What languages are supported by ViaCAD?</i>	46
<i>How do I use commas instead of periods for numbers?</i>	46
<i>Can I manually change from English to another language?</i>	47
Chapter 2: Drafting Questions	49
Text and Dimensions	49
<i>How do I set text attributes such as font size, style, and color?</i>	49
<i>How do I set the dimension font size?</i>	49
<i>Can I copy text and dimension attributes from one object to another?</i>	50
<i>How can I filter which attributes get copied with the Eye Dropper tool?</i>	50
<i>How can I align text of a dimension?</i>	50
<i>How can I change the measured Dimension Value?</i>	51
<i>How can I insert text in front or behind the dimension value?</i>	51
<i>How can I add multi-line text to a dimension?</i>	51
<i>How can I dimension a reflex angle?</i>	52
<i>What is a stacked dimension?</i>	52
<i>How can I control the draw order of text?</i>	53
<i>What does the 'Scale value with text size' check box do?</i>	53
<i>What objects can I use with the Smart Dimension tool?</i>	54
<i>Can I set Balloon dimension to calculate the width automatically tool?</i>	55
<i>Can I create a custom dimension type?</i>	55
<i>How do Dimensions behave inside of Draw Views?</i>	56
<i>What is the up vector for text along path*?</i>	56

<i>How can I set the default text/dimension attributes from an existing object*?</i>	57
Curves	57
<i>How do I change the color of a curve to a custom color?</i>	57
<i>Is there a quick way to create construction lines?</i>	58
<i>Can I create an arc tangent to 3 curves?</i>	59
<i>Can I create an arc at a specific length?</i>	59
<i>How can I create a tangent Line?</i>	60
<i>How can I create a circle tangent with two curves and diameter Line?</i>	61
<i>How can I make a polyline from a collection of lines?</i>	61
<i>Can I delete a polyline segment?</i>	62
<i>Can I draw arcs and polylines in the same command?</i>	62
<i>How can I find the center of a rectangle?</i>	63
<i>How can I find the center of an arbitrary shape?</i>	64
<i>How can I control which curves are hatched?</i>	64
<i>How can I find the total length of a collection of curves?</i>	65
<i>How can I change the dash length of a dashed line?</i>	65
<i>How can I manipulate spline points using Arrow keys?</i>	66
<i>How can I manipulate spline points using the Gripper?</i>	66
<i>Which spline type should I use?</i>	67
<i>What are the point of interest for a Control Point spline?</i>	68
<i>How can I identify the degree of a curve?</i>	69
<i>What is geometric continuity?</i>	70
<i>How can I tell if my curve is smooth?</i>	70
<i>How can I smooth a curve?</i>	70
<i>How can I match the start of a spline to another curve?</i>	71
<i>Can I match a slope with G2 continuity?</i>	72
<i>What tool is used to relimit a curve?</i>	75
<i>What objects can I trim a curve to?</i>	75
<i>How can I extend the number of objects selected when trimming?</i>	75
<i>How can I extend a curve to a selected boundary?</i>	75
<i>Can I use the Trim tool to keep a selected curve section?</i>	76
<i>How do I correct a gap in a collection of curves*?</i>	77
<i>How do I change the diameter of many circles at one time*?</i>	77
<i>How do I change the hatch region*?</i>	78
<i>What is the difference between Connect and Join*?</i>	78

<i>How do I Corner Trim two splines that do not intersect*?</i>	79	
Symbols		79
<i>How can I insert a symbol?</i>	79	
<i>How can I create custom symbols?</i>	80	
BOMs		81
<i>How can I apply custom attributes to objects?</i>	81	
<i>How can I delete BOM attributes that I have applied?</i>	82	
<i>Can I copy BOM attributes from one object to another?</i>	82	
<i>Can I create a custom set of attributes?</i>	83	
<i>How can I edit the names of many objects at once*?</i>	83	
Draw Views		84
<i>Can I create a new Hidden Line style to be used in draw views?</i>	84	
<i>How can I add objects to a draw view?</i>	84	
<i>Can I unfold a draw view?</i>	85	
<i>Where did my model go after using the Model to Sheet tool?</i>	85	
<i>How do I make a custom Model to Sheet template?</i>	85	
<i>Can I rotate a view on a draw sheet*?</i>	86	
Constraints		87
<i>What are the different coincident constraint types?</i>	87	
<i>How do I constrain between two endpoints?</i>	88	
<i>What does the Equal constraint keep constant?</i>	88	
<i>How do I constrain a minimum distance between two circles?</i>	88	
<i>Can I define a dimension in terms of another dimension?</i>	88	
<i>What expressions are allowed for equations?</i>	89	
<i>What is Chirality?</i>	89	
Miscellaneous		90
<i>Can I scale the size of a fill pattern?</i>	90	
<i>How do I convert a filled polygon to a hatch entity?</i>	90	
<i>Does Push/Pull recognize curves outside the major views?</i>	91	
<i>How can I create a new layer for selected entities?</i>	91	
<i>Is there a way to quickly pick the Select Tool?</i>	92	
<i>Why are my objects not appearing transparent?</i>	92	
<i>What is the coordinate system used in ViaCAD?</i>	92	
<i>How do I prepare a file for plasma, laser, or waterjet cutting?</i>	93	

Chapter 3: Surface Modeling Questions **97**

Skinning and Lofting	97
<i>What is skinning?</i>	97
<i>What is lofting?</i>	98
<i>What curve types can be used for skinning and lofting?</i>	98
<i>What is a ruled surface?</i>	99
<i>What are guide curves for a skinned surface?</i>	99
<i>Can I use a Point entity as a guide curve?</i>	99
<i>Can I use more than one curve as a section in a Skin Surface?</i>	100
<i>Is it possible to make a Skin Surface go to a point?</i>	100
<i>How can I control the tangency of a Skin Surface?</i>	100
<i>Can I remove a curve from a Skin Surface?</i>	101
<i>What does the 'Arc Length V' Option do to a Skin Surface?</i>	102
<i>What does the 'Arc Length U' Option do to a Skin Surface?</i>	102
<i>What does the 'Closed Last Section' option do to a Skin Surface?</i>	103
<i>What does the 'Auto-Align Sections' option do to a Skin Surface?</i>	103
<i>What does the Minimize Twist option do to a Skin Surface?</i>	104
<i>What is a Centerline Skin Surface?</i>	104
<i>Can I loft between a surface and a curve?</i>	104
<i>What does the bulge factor control in a loft surface?</i>	105
<i>What conditions apply to curve guides used in Skin surfaces*?</i>	106
Covering	106
<i>What is covering?</i>	106
<i>What is planar covering?</i>	106
<i>What is n-sided covering?</i>	107
<i>How can I cover with Guide Curves?</i>	107
<i>Can I use internal regions for a cover surface?</i>	108
<i>What is tangent covering?</i>	109
<i>What does it mean to fill with a tangent cover?</i>	109
<i>What does it mean to cap with a tangent cover?</i>	109
<i>What is the Bulge Factor in a Tangent Cover Surface?</i>	109
<i>How can I repair curves for covers?</i>	110
<i>How can I further control the shape of a Cover Surface with Guides*?</i>	111
Net Surface	112
<i>What is a Net Surface?</i>	112

<i>What curve types can be used for a net surface?</i>	112
<i>Are the direction of the curves in a net surface important?</i>	112
<i>Do the curves in a net surface need to touch?</i>	113
<i>How can I create a smooth cap using a Net Surface?</i>	113
Swept Surface	114
<i>Swept Surface?</i>	114
<i>What is the difference between sweep in place and sweep perp?</i>	115
<i>What does the 'Maintain Height' option do in a Two Rail Sweep?</i>	115
Surface Utilities	115
<i>How can I tell the direction or orientation of a surface?</i>	115
<i>Is it possible to repair a bad surface?</i>	116
<i>How can I visualize a degenerative surface?</i>	116
<i>Is it possible to repair a degenerative surface?</i>	117
<i>What is surface associativity?</i>	117
<i>How can I flip the rotation direction of a surface of revolution?</i>	118
<i>What controls the portion of a surface removed in a Boolean operation?</i>	118
<i>Can I do a Boolean operation between a surface and a solid?</i>	119
<i>Can I fix a gap between two surfaces?</i>	120
<i>How does a zebra plot indicate surface smoothness?</i>	120
<i>Can I project a curve by minimum distance to a surface?</i>	120
<i>How can I create equally spaced section cuts?</i>	121
<i>Can I resize the display of an Infinite Plane*?</i>	122
<i>Can I trim a surface with a solid*?</i>	122
Subdivision Mesh	123
<i>What is subdivision modeling*?</i>	123
<i>What form of Subdivision Mesh does ViaCAD use*?</i>	124
<i>How do I subdivide a Mesh?</i>	125
<i>Can I reduce the number of subdivisions?</i>	125
<i>How do I hide the control polygon of a Subdivision Mesh?</i>	126
<i>Can I add facets without smoothing a mesh?</i>	126
<i>How do I extrude a mesh face?</i>	127
<i>Is it possible to scale/copy a facet?</i>	128
<i>Is it possible delete a facet?</i>	128
<i>Is it possible add a loop?</i>	129
<i>Can I create an OBJ file of the control polygons?</i>	130

<i>Does a Cover Mesh support holes?</i>	130
<i>Can I convert a subdivision mesh to a solid?</i>	131
<i>How do I enable Mesh Symmetry*?</i>	131
<i>What type of intersections does ViaCAD support?</i>	132
<i>How can I convert an object with NURBs to Analytic Surfaces?</i>	133
<i>What are the surface tools available in ViaCAD 2D3D?</i>	134
<i>What additional surface tools are available in ViaCAD Pro?</i>	135
<i>What additional surface tools are available in SharkCAD Pro?</i>	135

Chapter 4: Solid Modeling Questions **137**

Primitives	137
<i>How can I make a truncated cone?</i>	137
<i>How can I make an elliptical cylinder?</i>	138
<i>How can I access the primitive control points?</i>	139
Solid From Profiles	139
<i>What does the Curves are not Planar dialog box?</i>	139
<i>How can I repair gaps in a profile?</i>	139
<i>How can I find overlapping curves?</i>	140
<i>Can I extrude a non-planar shape?</i>	140
<i>How can I sweep a 3D non-planar path?</i>	140
<i>How can I create multiple cutouts going the same direction in a single solid?</i>	141
<i>How can I make a pipe that overlaps?</i>	142
Feature Based Solids	142
<i>What is a feature based solid?</i>	142
<i>Is it possible to keep the core when shelling?</i>	143
<i>Is it possible to shell a model using multiple thicknesses?</i>	143
<i>How can I completely hollow a model?</i>	144
<i>Can I associate a hole center with a point entity?</i>	144
<i>What is the Project from Referenced Snap dialog box for holes?</i>	145
<i>What are the key definitions in entity bending?</i>	145
<i>How do you control which part of an object gets bent?</i>	146
<i>Can I bend parts that are not flat?</i>	146
<i>How does K-factor relate to the neutral plane?</i>	147
<i>How do I control the orientation of a part bent along a curve?</i>	147
<i>How can I minimize the stretching in the bend along curve tool?</i>	147
<i>What is edge based blending?</i>	148

<i>How do I specify a radius curve to use in blending?</i>	151
<i>How do I blend two bodies together?</i>	151
<i>How do you create the rounded edges of a bolt head top?</i>	152
<i>What is edge based chamfering?</i>	153
<i>Can I flip the orientation for a length/angle chamfer?</i>	157
<i>Can I chamfer over an existing feature?</i>	157
<i>How is the angle defined for a countersink hole?</i>	158
Direct Face Editing	158
<i>What 2D shapes can be pushed or pulled into a solid?</i>	158
<i>Can I push or pull more than one face?</i>	159
<i>How can I defeature a model?</i>	159
<i>What is the reference face in the draft face tool?</i>	160
<i>Can I thicken an entire body?</i>	160
<i>Can I thicken a collection of open surfaces?</i>	161
<i>How can I match to the other side of a body*?</i>	161
Solid Modeling Utilities	161
<i>How can I convert facets to a solid?</i>	161
<i>What does the 'Change a Solid into Solid' option do?</i>	162
<i>What does the Closed Volumes Required option do?</i>	162
<i>How can I change twist continuity?</i>	163
<i>What does the start angle do in the twist tool?</i>	164
<i>How can I disable automatic part regen on surface updates?</i>	164
<i>Is there a way to view and modify my history?</i>	165
<i>How do I add a material to the Mass Properties dialog box?</i>	165
<i>Can I calculate the mass properties of an assembly?</i>	167
<i>How do I calculate the section properties from a solid tube?</i>	167
<i>How do I calculate the Moment of Inertia for cross sections?</i>	168
<i>Why does a part name appear to change?</i>	169
<i>What does illegal alignment face mean with the Insert Face tool?</i>	170
<i>How can I calculate the bounding box in another coordinate system*?</i>	170
<i>How do I make a spiral hole pattern on a cylinder*?</i>	171
<i>How do I make a spiral hole pattern on a flat plate*?</i>	173
<i>How do I trim a solid to another solid*?</i>	175

Object Display Resolution	177
<i>Why does a circle appear to be a collection of straight-line segments?</i>	177
<i>Why do prints appear to be a collection of straight-line segments?</i>	178
<i>How do I change an existing object's resolution?</i>	178
<i>Can I change the default resolution?</i>	178
<i>Can I customize curve resolution angles?</i>	178
<i>How can I display a faceted object beyond Super Fine resolution?</i>	179
<i>Why does there appear to be a gap when I zoom up*?</i>	180
Viewing Data	181
<i>How can I change the View Orientation?</i>	181
<i>How can I rotate, pan, and zoom the View?</i>	181
<i>How can I zoom at anytime using the keyboard?</i>	182
<i>How can I save a view and zoom configuration?</i>	182
<i>In addition to Shaded, what other display modes exist to view objects?</i>	183
<i>What is anti-aliasing?</i>	184
<i>How can I change the direction of an OpenGL textured material?</i>	184
<i>In addition to Shaded, what other display modes exist to view objects?</i>	185
<i>How is the draft angle analysis tool used?</i>	185
<i>Why does my part disappear in different views?</i>	186
<i>Can I visually inspect the facet display list of a solid?</i>	187
<i>Can I change the color of the edges displayed as part of a solid?</i>	187
<i>Why are the grid lines displaying through the model*?</i>	188
<i>Why don't I see the sides of a cylinder in my views*?</i>	188
Chapter 6: Photo Realistic Rendering Questions	191
Applying Materials	191
<i>Can I render photo render curves, text, and dimensions?</i>	191
<i>How can I apply a material to many objects?</i>	192
<i>How can I assign a material to an object within a group?</i>	192
<i>How can I render an object to match a specific material?</i>	193
Adjusting Angles of Applied Materials	193
<i>What's the difference between a procedural and texture mapped material?</i>	193
<i>How can I adjust the angle of a wrapped image material?</i>	194
<i>How can I change the direction of a procedural material?</i>	195
Achieving Realistic Renderings	196

<i>What's a quick and easy way to improve the realism of an object?</i>	196
<i>How can I reduce the facet appearance in my rendered images?</i>	196
<i>How can I make a light source glow?</i>	197
<i>How can I make light project through designed objects?</i>	198
<i>How can I make a light cast a jpg image?</i>	199
<i>How can I make a clear glass material?</i>	200
<i>Within Edit Object>Material, what does 'is backdrop object' mean?</i>	200
<i>Is there a way to tell which HDRI background I currently have applied?</i>	201
<i>How do I add HDRI backgrounds?</i>	201
<i>Can I change the Rapid Render settings?</i>	202
<i>Why is my environment map not working?</i>	202
<i>Is it possible to change the default light intensity?</i>	203

Chapter 7: Sharing Data Questions

205

Surface & Solid Model Formats	205
<i>What formats support surfaces and solids?</i>	205
<i>What is the best format to share 3D surfaces and solids?</i>	206
<i>What does ACIS stand for?</i>	206
<i>What applications are based on ACIS?</i>	207
<i>What is the best format for SolidWorks?</i>	207
<i>What is the best format for Inventor?</i>	207
<i>How can I confirm my exported STEP file is valid?</i>	207
<i>What happened to the 3D data in my DWG file?</i>	208
<i>Why do my DXF/DWG files appear scaled?</i>	208
<i>Why is my text font wrong exported to DWG?</i>	209
<i>Does IGES support text and dimensions?</i>	209
<i>When should I use the IGES format?</i>	209
<i>Why does my spline turn into a polyline in DXF/DWG?</i>	209
<i>What Happened to Line Weights Exported to AutoCAD?</i>	209
<i>How are Blocks handled with DWG/DXF import*?</i>	210
Facet Based Formats	210
<i>How do I share data with the Electric Image Animation System?</i>	210
<i>What facet format preserves surface normals?</i>	211
<i>What formats are based on facets?</i>	211
<i>What is the preferred format to export data to SketchUp?</i>	211
<i>What is the best format to import data from SketchUp?</i>	212

<i>Is it possible to shell a model made in SketchUp?</i>	212
<i>Can I export a quad mesh?</i>	213
<i>How can I reduce sliver facets when exporting?</i>	214
<i>What controls are available for converting solids to meshes?</i>	214
Additional Formats	219
<i>How can I import spline data from Excel?</i>	219
<i>How can I import point data from Excel?</i>	219
<i>How do I scale an export to Adobe Illustrator?</i>	220
<i>How can I import Vectors from Adobe Illustrator?</i>	221
<i>How can I import text from Adobe Illustrator?</i>	222
More Data Sharing Tips	223
<i>What extensions can be dragged and dropped?</i>	223
<i>How can I export a hidden line drawing to Illustrator?</i>	224
<i>How can I export a shaded drawings to Illustrator?</i>	224
<i>Can I read a ViaCAD V8 file into ViaCAD V7?</i>	224
<i>Can I read a ViaCAD Pro file into ViaCAD 2D/3D?</i>	225
<i>What file formats contain unit settings?</i>	225
<i>Is it possible to read airfoil data?</i>	225
<i>What formats read/write text and dimensions?</i>	227
<i>How can I import a surface grid?</i>	227
<i>Can I import a point cloud?</i>	228
<i>Can I open a PhotoShop/EPS/PDF file?</i>	229
<i>Can I export to 2D PDF?</i>	229
<i>Why is my model not displaying in Acrobat Reader as 3D PDF*?</i>	230
<i>Is it possible to speed up IGES imports*?</i>	230
Chapter 8: 3D Printing	231
3D Printing	231
<i>What tools are available for 3D Printing*?</i>	231
<i>What checks are performed with the 3D Print Check tool*?</i>	232
<i>How do I repair a bad surface normal*?</i>	233
<i>What angle is represented in the Overhang*?</i>	233
<i>Does the Slice tool only work with mesh/STL data*?</i>	234
<i>How do I get objects to snap to the print floor*?</i>	234
<i>How can I sort objects by size?</i>	235
<i>How do I add a 3D Printer definition to the Printer Settings dialog*?</i>	235

STL Files	236
<i>What is a STL file*?</i>	236
<i>How do I export a STL file?</i>	237
<i>Can I import a STL file*?</i>	238
<i>What parameters are available for creating STL files?</i>	238
<i>Can I change the edge color displayed in the STL export command?</i>	239
<i>Do STL files have unit information* ?</i>	239
<i>Do STL files save color information*?</i>	240
3MF Files	240
<i>What is a 3MF file*?</i>	240
<i>What applications support 3MF?</i>	241
<i>How does 3MF compare to OBJ and VRML?</i>	242
<i>How does 3MF compare to IGES and STEP?</i>	242
Preparing Models for 3D Printing	242
<i>Does part orientation make a difference*?</i>	242
<i>Can I include lettering on my printed models*?</i>	243
<i>How do I know if my model is 3D printable*?</i>	244
<i>How do I check my part for extra shells*?</i>	244
<i>How much does a typical 3D Printer part cost*?</i>	245
<i>How does volume impact the cost of a 3D printed*?</i>	245
<i>What methods exist for reducing volume of a part*?</i>	246
